Subject: Hidden Valley Mine

John - I remember recently you told me you would tell me what Consol was going to do with the Hidden Valley Mine. During inspections, it has been noted that work was completed on silt fences. However, the Repair on Undisturbed diversion ditch above A seam side (that was noted in inspection report 3/31/2005) was not completed and maintenance on filter fabric sediment control on outslope of access road was not done.

These issues have to be resolved and can't be left hanging.

Please let me know by the end of July what Consol plans are for Hidden Valley Mine.

Thank you.

Pam
